Wild Horses is a coming-of-age novel set in Khartoum, Sudan, beginning in 2018, against the backdrop of a country unknowingly approaching a historic turning point.

The story follows **Sari**, an intelligent, eccentric, and socially unconventional sixteen-year-old, as he navigates adolescence alongside a chaotic circle of friends. What begins as an ordinary teenage experience of friendship, romance, school, rivalries, and reckless adventures gradually develops into something far more complex.

Told retrospectively through Sari's conversations with a woman named Maria in 2036, the novel explores the contradictions of memory, the unreliability of personal perspective, and the strange ways people interpret their own lives.

Blending comedy, romance, philosophy, religion, psychology, and historical events, *Wild Horses* captures a generation coming of age in the final years of an era, unaware that both their country and their personal worlds are about to change forever.

At its heart, **Wild Horses is a story about growing up, the people who shape us, and the difference between what actually happened and the stories we tell ourselves about it.**
